

**ORSCO® Coaxial Systems**

**Precision Injector and Co-Axial  
Lubrication Assemblies**

**ORSCO systems are preferred for their reliability. When you have a job that needs to get done, ORSCO is the name you can trust for dependable lubrication.**

## Consistent—Dependable—Reliable

### System Features

- Point of use lubrication delivery
- High level of control
- Modular connectors for easy maintenance
- Central fill capability

ORSCO Coaxial systems provide oil injection for exact air tool lubrication.

### Benefits

- Proper lubrication of air tools
- Consistent torque
- Decrease in air tool maintenance
- Decrease in housekeeping costs

### Options

- Multiple air tool lubrication capabilities
- Suspension options (all tool rail types)
- Automatic or manual lubricant fill
- Standard or custom assemblies
- Hose selection options
- Tool end coupling type options
- Base assembly options

### Applications

#### Single Point

- Air tools (short cycle)
- Cylinders
- Pumps
- Rivet guns
- Air valves

#### Air Logic Lubricator

- Grinder air motors
- Dye mixer motor
- Air powered drills
- Long running air motors (run longer than one minute)
